

Your entire outbound engine. **One click.**

Automated lead sourcing, multichannel outreach,
and real-time analytics — running end to end, with
zero humans in the loop.

Website in. **Meetings out.**

● Sourcing → meetings

● 0 humans in the loop

THE PROBLEM

Modern outbound is broken.

Slow

2–3 months to ramp an SDR. 2–4 weeks to see anything from ads.

Fragmented

Lists in one tool, email in another, LinkedIn in a third. Nothing talks to each other.

Manual & expensive

Hours of copy-paste prospecting. Roughly \$800+ per qualified lead through SDRs or ads.

Single-channel

One cold email into a dead inbox. One channel means one chance to be ignored.

Flying blind

You find out a campaign failed after the month is already over.

THE REAL PROBLEM

You don't have a lead problem. You have a **pipeline-on-manual** problem.

THE SOLUTION

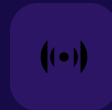

One platform. One click. The whole pipeline.

LeadsIQ replaces your entire outbound stack with a single autonomous engine.

Automated lead sourcing

We find your best-fit buyers for you. You never build another list.

Multichannel outreach

Email, LinkedIn, WhatsApp, and AI voice calls — orchestrated together, automatically.

Real-time analytics

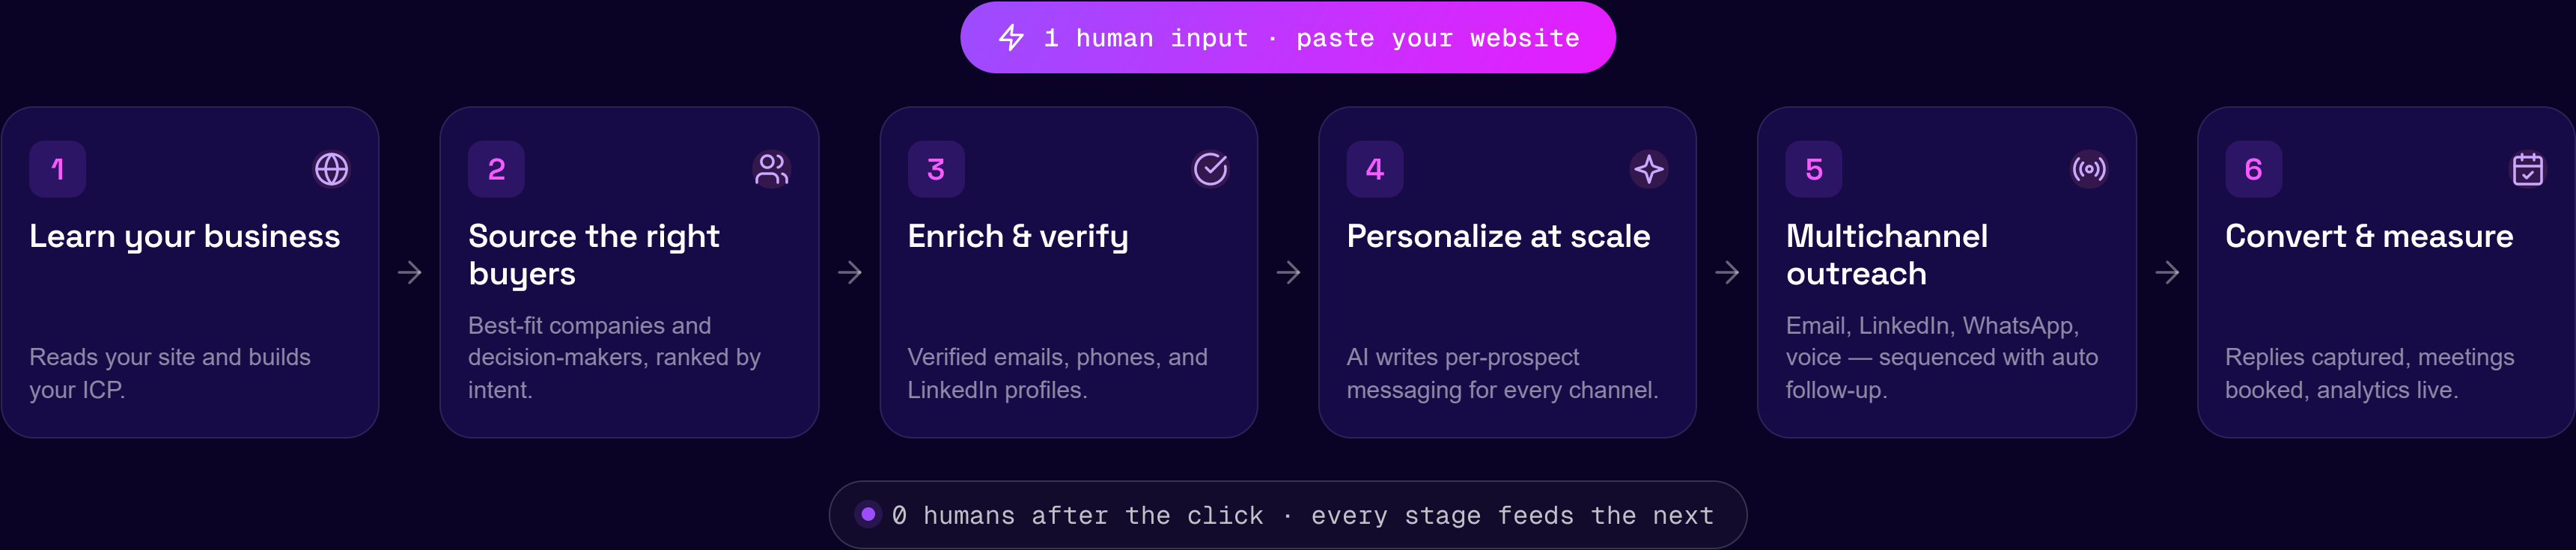

Watch every lead, send, open, reply, and booked meeting update live.

THE ONE HUMAN STEP You enter your website — **leadsiq.app** does the rest, on autopilot.

HOW IT WORKS - END TO END

From your URL to booked meetings.

AUTOMATED LEAD SOURCING

We find your buyers. You never build a list again.

-  **Self-building ICP.** From your website alone, the engine learns your industry, size, stage, and the roles that buy.
-  **Best-fit, not bulk.** Prospects ranked by intent and buying signals — not scraped at random.
-  **Decision-makers, surfaced.** C-suite and VP-level contacts identified and prioritized automatically.
-  **Always verified.** Every email and phone validated before a message goes out — protecting your deliverability.

RESULT

Lists that took an SDR **a week** are built in **minutes** — and they're cleaner.

The whole market
millions of companies

Best-fit companies
matched to your ICP

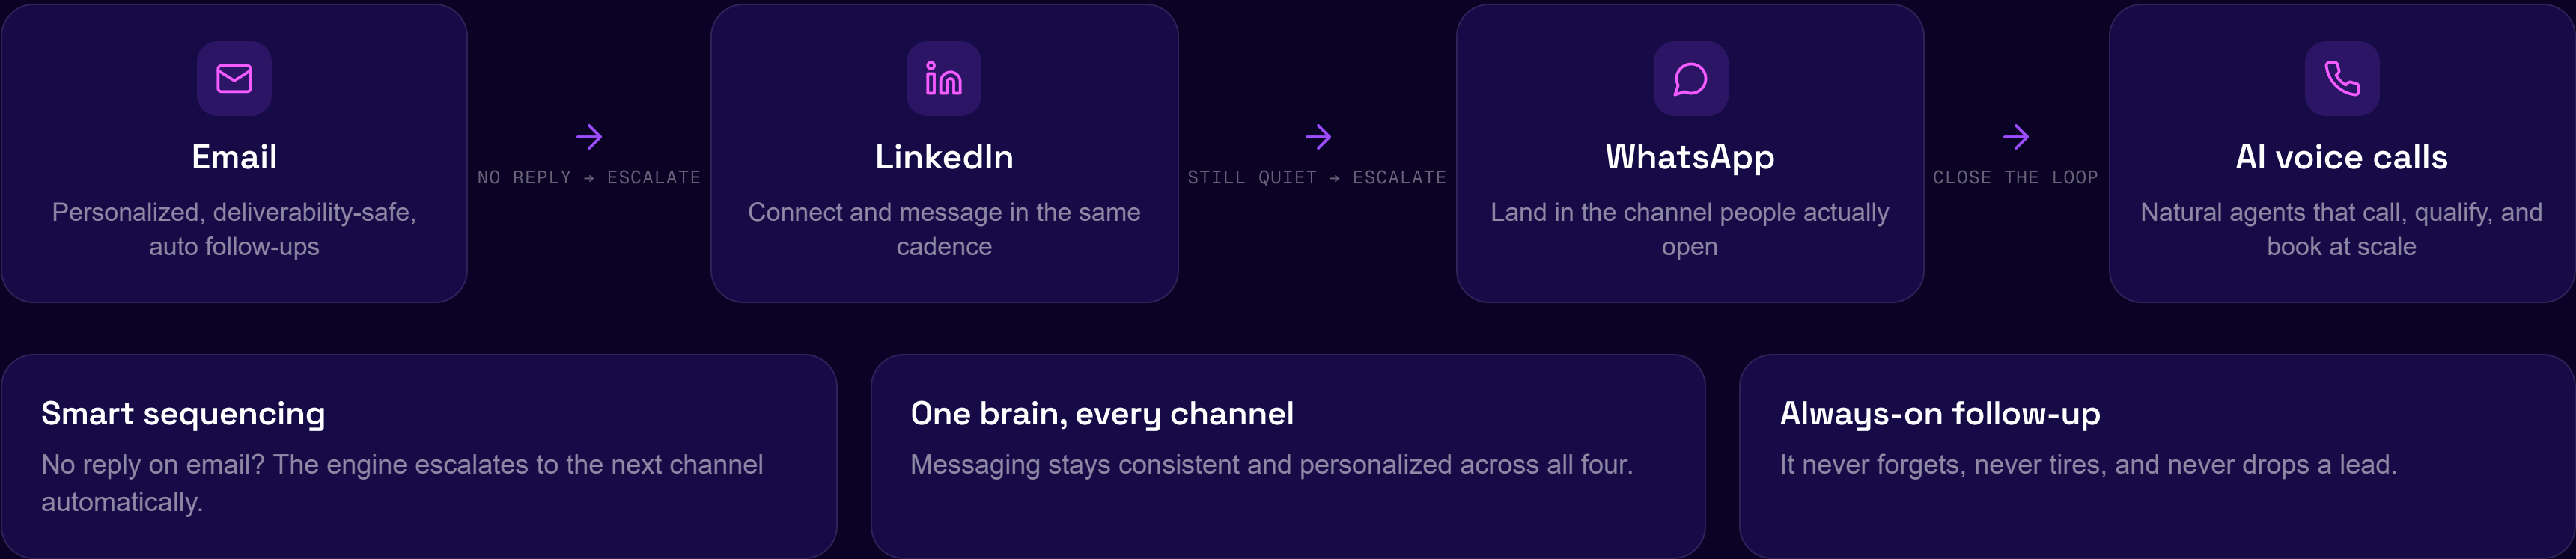

High-intent accounts
ranked by buying signals

Verified buyers
decision-makers, ready to reach

Four channels. One orchestrated sequence.

Most tools send one cold email and hope. We meet your buyer everywhere they already are.

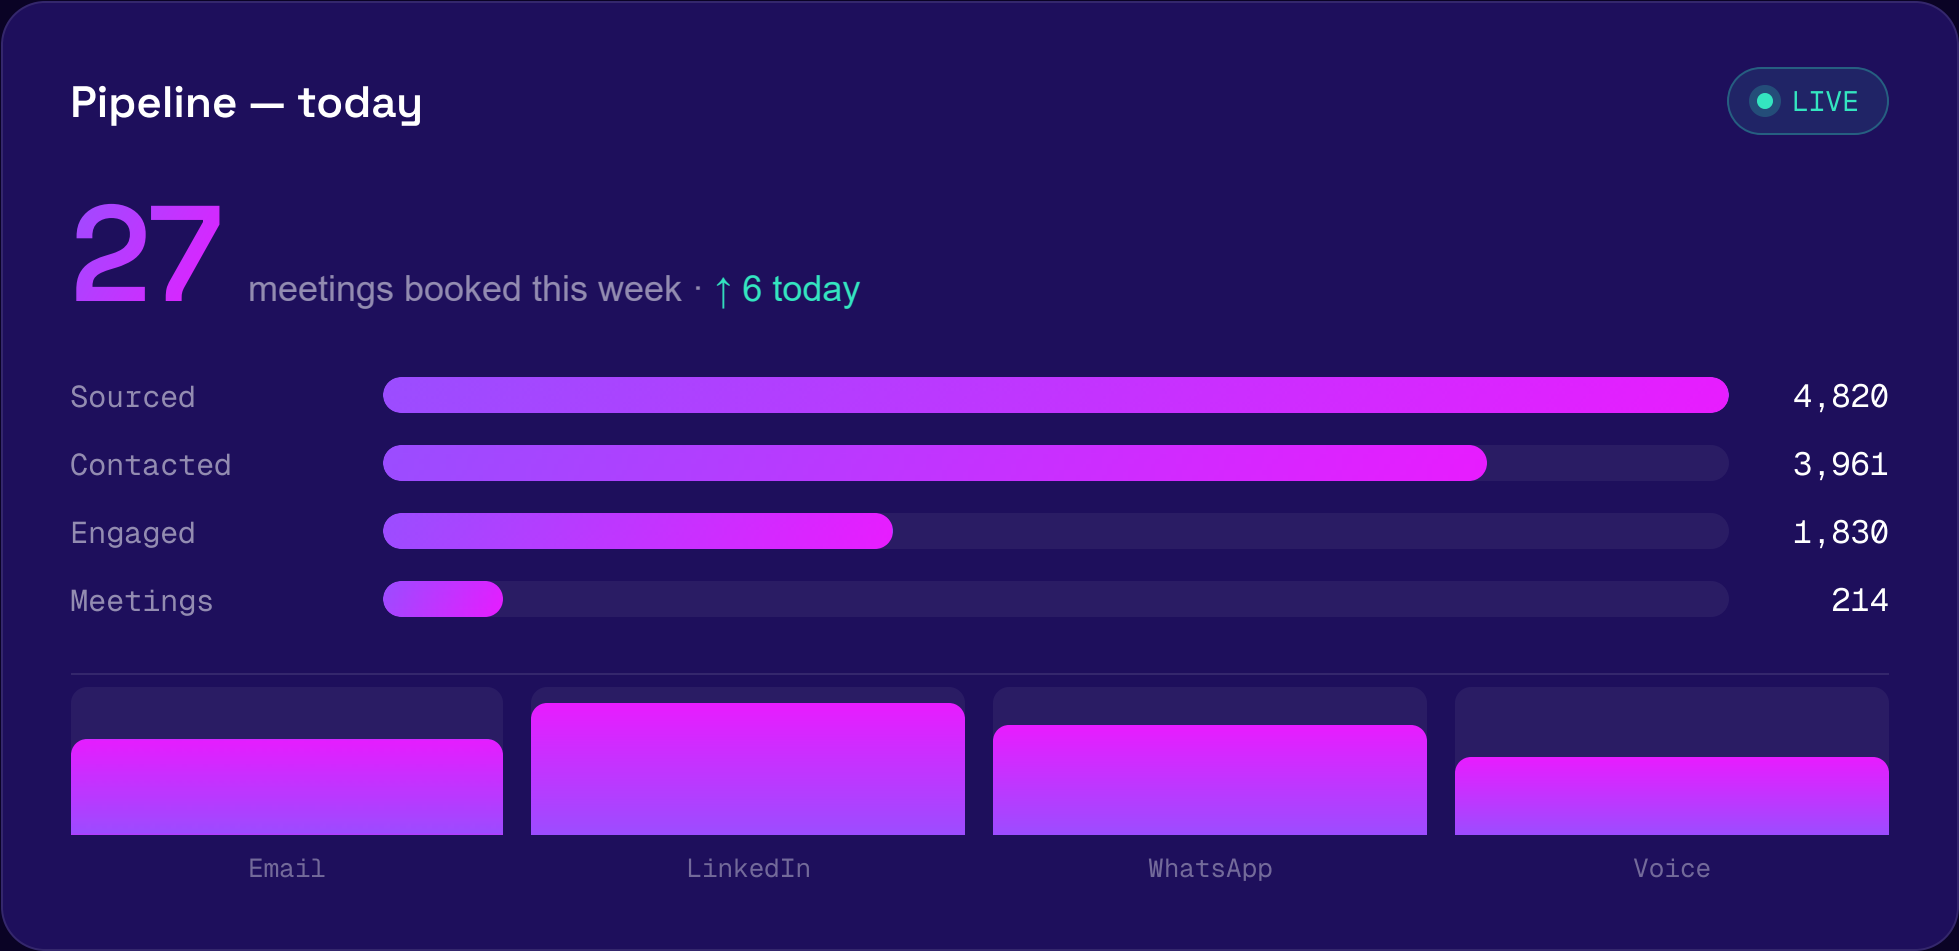

REAL-TIME ANALYTICS

Your entire pipeline, live.

No more waiting until month-end to learn what worked.

-  **Live pipeline view.** Every lead sourced, contacted, opened, replied, and booked — in real time.
-  **Channel performance.** See which channel drives replies right now, so spend follows what works.
-  **Self-optimizing.** The engine learns from every reply and reallocates automatically.

RESULT **Decisions in seconds, not weeks.**

What you actually get.

~48h

First qualified leads

Not weeks. Not months.

90%

Lower cost per lead

vs. hiring SDRs or running ads

4×

The channels

Email + LinkedIn + WhatsApp + Voice

0

Humans in the loop

After one click, the engine runs itself

100%

Verified, intent-ranked leads

Decision-maker-level — not a raw scrape

The old way vs. the autopilot way.

	Hiring SDRs	Running ads	LeadsIQ
Time to first leads	2–3 months	2–4 weeks	✓ ~48 hours
Cost per qualified lead	~\$800+	~\$750	✓ A fraction of it
Channels	1–2, manual	1	✓ 4, orchestrated
Lead sourcing	Manual	N/A	✓ Automated
Analytics	Spreadsheets	Lagging	✓ Real-time
Human effort	Constant	Constant	✓ One click

HOW YOU START

Live in minutes. Pipeline by tomorrow.

1

Paste your website

We learn your business and build your ICP.

2

Approve & launch

Review the plan once, then hit go.

3

Watch meetings land

Leads flow in across all four channels, tracked live.

No contracts. No setup fees. **Zero setup required.**

PUT YOUR GTM ON AUTOPILOT

Paste your website. Watch the pipeline fill itself.

Stop building lists. Stop chasing one channel. Stop guessing.
